Appendix E Condition Assessment Framework Part 6 - Sewer Systems

### 800 - Cowichan Bay Sewer

Infrastructure Condition Assessment and Capital Plan 1825 Cowichan Bay Road., Cowichan Bay, BC

#### PROPERTY STATISTICS AND REPORT SUMMARY

System Replacement Cost Estimate	\$17,692,159	
Number of Users	870	
Replacement Cost Per User	\$20,336	
Annual Replacement Cost (40 Years)	\$289,143	per year
Annual Replacement Cost (80 Years)	\$218,422	per year
10 Year Capital Plan Total	\$125,000	
10 Year Operations and Maintenance Plau	\$165,000	

#### **PROPERTY DESCRIPTION**

The Cowichan Bay Sewer system started construction in 1972 and includes the phases outlined in the table below.

Development	Year Installed	Source
Collection System	1972	CBS-931401
Cowichan Bay Rd	2000	Record Drawings (237-01-01)
Lift Station (Cowinchan Bay)	2004	Record Drawings (12032400)
Glen Rd/Rondeault Rd/Simon Place	2004	Record Drawings (1431-01)
Simon Place	2004	Record Drawings (1448-01)
Forcemain	2005	Record Drawings (12032400)
Casalinda Place	2005	Record Drawings (010932-20)
Falcon Crescent	2006	Record Drawings (1004-C)
Cowichan Bay Rd	2006	Record Drawings (EV1153-1-03)
Buena Vista Place/Regatta Place	2010	Record Drawings (1600-01-01)
Cowichan Bay Rd	2011	Record Drawings (101-15938-00)
The Cannery	2015	Record Drawings (3093-002)
Vee rd/Mallard way	2015	Record Drawings (1053-C-01)

#### **PROJECT TEAM**

Austin Tokarek, Asset Coordinator Todd Etherington, Utility Operations Superintendent David Parker, Engineering Technologist III Rob Grant, GIS Supervisor Andrea Kross, GIS Technician I Adam Greenwood, Project Engineer Kieran Bertsch, E.I.T. Caleb Light, GIS

#### **REPORT NOTES**

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and	The visual reviews were completed on November 21-24,
	Kieran Bertsch	2017 by Adam Greenwood and Kieran Bertsch of MH.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 2, 2018	Adam Greenwood and Kieran Bertsch	STEP Systems were identified in the GIS System. We have assumed that these systems are the responsibility of the homeowner and therefore the CVRD is not respondible for the replacement and servicing of these systems.
March 2, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
June 14, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

### Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical	1						
Critical (0 - 1 Year)	2						\$0
(0 - 1 (64))	3						
	4						
Important (1 - 2 Year)	5						\$0
(1-2 (ear)	6						
Short Term	7	2	S-LS-COM-6	Capital Renewal	Locate VFDs and control panels in lift station housing to reduce condensation.	\$5,000	¢25.000
(2 - 5 Year)	8	3	S-LS-GEN-11	Capital Renewal	Install generator to code at Buena Vista PI lift station.	\$20,000	\$25,000
	9						
	10	2	S-LS-GEN-7	Capital Upgrade/New	Replace generator at lift station.	\$100,000	
Medium Term (5 - 10 Year)	11						\$100,000
(5 - 10 fear)	12						
						Total	\$125,000

### Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical	1						
Critical (0 - 1 Year)	2						\$0
(0 - i rear)	3						
Important	4						
(1 - 2 Year)	5						\$0
(1 1 1 0 0 1 )	6						
	7	1	S-LS-BLD-1	Maintenance	Outfall of Lagoons may be upgraded by JUB. Confirm portion of cost to be contributed to outfall improvements and any other future lagoon upgrades/improvements.	\$10,000	
Short Term	8	2	S-LS-BLD-2	Maintenance	Issues with I&I have resulted in LS backups and trucking sewage. Continue I&I investigation and repairs.	\$40,000	
(2 - 5 Year)		4, 20, 23, 30 and 42	ALL	Operations	Inspect/flush forcemain to confirm there are no operational issues.	\$40,000	\$105,000
	10	48	S-STP-DF-103	Operations	Review condition of disposal field.	\$15,000	
	11						
	12						
Medium Term	13	17 to 48	ALL	Operations	Inspect/assess collection system and manholes for deterioration and I&I issues to determine replacement timing/phasing. This will include visual inspections, and/or reviewing historical maintenance and repair frequencies.	\$60,000	¢c0.000
(5 - 10 Year)	14						\$60,000
	15						
	16						
	17						
						Total	\$165,000

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

### 801 - Brulette Place Sewer

Infrastructure Condition Assessment and Capital Plan Brulette Place, Mill Bay, BC

#### **PROPERTY STATISTICS AND REPORT SUMMARY**

System Replacement Cost Estimate	\$2,853,530	
Number of Users	56	
Replacement Cost Per User	\$50,956	
Annual Replacement Cost (40 Years)	\$45,927	per year
Annual Replacement Cost (80 Years)	\$35,229	per year
10 Year Capital Plan Total	\$290,000	
10 Year Operations and Maintenance Plan Total	\$26,000	

#### **PROPERTY DESCRIPTION**

The Brulette Place Sewer system was originally constructed by a developer with multiple household scale treatment systems connected together for treatment. The CVRD has purchased a membrane treatment system (TORAY) and will be retrofitting the treatment system in the near future. THe date of the original system install was not available at the time of this assessment.

507

Development	Year Installed	Source
Treatment System - Multiple household scale	n/a	
treatment systems	(assumed 2000)	CVRD Input
Treatment System - RBC and RIB for 19 units	n/a (assumed 2000)	CVRD Input
Brulette Place Collection	2003	Record Drawing (151-01)

Infrastructure Condition Assessment and Capital Plan Brulette Place, Mill Bay, BC

#### **REPORT NOTES**

Date Prepared

July 18, 2018

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 2, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
June 29, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	<ul> <li>Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks:</li> <li>1) Reorganize linear assets based on street names</li> <li>2) Complete building asset management seperately (to be completed by Chris Raudoy)</li> <li>3) Include disclaimer on cost estimates</li> <li>4) Create seperate tables for O&amp;M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New</li> </ul>

508

Date Prepared July 18, 2018

# **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

# Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical	1	1	S-STP-STP-1	Capital Renewal	Install Toray System and modify existing system.	\$250,000	
Critical (0 - 1 Year)	2						\$250,000
	3						
luce estant	4						
Important (1 - 2 Year)	5						\$0
(1 - 2 Tear)	6						
Short Term	7	1	S-STP-GEN-5	Capital Renewal	Replace generator for STP (scheduled).	\$40,000	\$40,000
(2 - 5 Year)	8						
(2 - 5 (61)	9						
Medium Term (5 - 10 Year)	10						
	11						\$0
	12						
						Total	\$290,000

# Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total	
	1							
Critical (0 - 1 Year)	2						\$0	
(0-11ear)	3						+-	
	4							
Important (1 - 2 Year)	5						\$0	
(1-2 fear)	6							
	7	1	S-STP-UV-6	Operations	Inspect/assess UV filter in STP to ensure it is performing well.	\$2,000		
	8	2	S-STP-STP-8 and S-STP-PP-9	Operations	Review condition of RBC treatment system for deterioration to determine replacement timing/phasing.	\$5,000	\$16,000	
Short Term (2 - 5 Year)	9	3	S-STP-STP-10	Operations	Review condition of RIB treatment system for deterioration to determine replacement timing/phasing.	\$5,000		
	10	4	ALL	Operations	Inspect/assess lift station and pumps to ensure they are performing well.	\$2,000		
	11	5	ALL	Operations	Inspect/assess lift station and pumps to ensure they are performing well.	\$2,000		
	12							
Medium Term (5 - 10 Year)	13	1	S-STP-PP-2	Operations	Inspect/assess process piping in STP for deterioration to determine replacement timing/phasing. This may include pressure testing, visual inspections (exposing), and/or reviewing historical maintenance and repair frequencies.	\$5,000		
	14	1	S-STP-COM-4	Operations	Assess communication system to ensure it meets the system needs.	\$5,000	\$10,000	
	15							
	16							
	17							
						Total	\$26,000	

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

# 802 - Sentinel Ridge Sewer

Infrastructure Condition Assessment and Capital Plan 2372 Coopers Hawk Rise, Mill Bay, BC

REPORT NOTES		
Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 2, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
June 29, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

532

## 802 - Sentinel Ridge Sewer

Infrastructure Condition Assessment and Capital Plan 2372 Coopers Hawk Rise, Mill Bay, BC

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

## Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
	1						
Critical (0 - 1 Year)	2						\$0
(0-1 (ear)	3						
	4						
Important (1 - 2 Year)	5						\$0
(1-2 (ear)	6						
Short Term	7	1	S-STP-BLW-19	Capital Upgrade/New	Install new blowers in STP to double capacity when system is expanded (scheduled).	\$200,000	¢200.000
(2 - 5 Year)	8						\$200,000
	9						
	10	1	S-STP-STP-2	Capital Upgrade/New	Add Purafil unit to STP for odour control (scheduled).	\$30,000	
Medium Term	11						\$30,000
(5 - 10 Year)	12						
						Total	\$230,000

## Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
	1						
Critical (0 - 1 Year)	2						\$0
(0 - 1 fear)	3						
luc a cuto a t	4						
Important (1 - 2 Year)	5						\$0
(1-2 Teal)	6						
	7	1	As Noted	Operations	Inspect/assess STP and treatment process for deterioration to determine replacement timing/phasing.	\$15,000	
Short Term (2 - 5 Year)	8	2	ALL	Operations	Inspect/assess Mill Bay marina lift station for deterioration to determine replacement timing/phasing.	\$10,000	
	9	3	ALL	Operations	Inspect/assess Hidden Creek lift station for deterioration to determine replacement timing/phasing.	\$10,000	\$35,000
	10						
	11						
	12						
	13	2	S-LS-WW-40	Operations	Continue to work with Marina to limit FOG (fats, oils and grease) entering Mill Bay marina lift station.	\$5,000	
Medium Term	14	4 to 7, 9, 10, 13 to 27	As Noted	Operations	Assess/Inspection forcemain for deterioration to determine replacement timing/phasing.	\$30,000	\$45,000
(5 - 10 Year)	15	28	S-STP-DF-108	Operations	Assess/Inspection disposal field for deterioration to determine replacement timing/phasing.	\$10,000	
	16						
	17						
		L L				Total	\$80,000

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

PROPERTY STATISTICS AND REPORT SUMMARY

System Replacement Cost Estimate	\$6,285,197	
Number of Users	74	
Replacement Cost Per User	\$84,935	
Annual Replacement Cost (40 Years)	\$65,866	per year
Annual Replacement Cost (80 Years)	\$77,595	per year
10 Year Capital Plan Total	\$150,000	
10 Year Operations and Maintenance Plan Total	\$120,000	

## **PROPERTY DESCRIPTION**

The system was originally constructed in 2008 and includes the phases outlined in the table below.

Development	Year Installed	Source
Sewage Treatment Plant	2008	CVRD Input
Hutchinson Road Lift Station and Twin Cedars	2008	Record Drawing (011497-20)
Rapid Infiltration Basin	2011	CVRD Input
Fisher Road, Heigh Road and Watson Road	2013	Record Drawing (2240-2)
Pine St, Princess Ave, Fairfield Rd, Garland Ave	2013	Record Drawing (2240-3)
Fairfield Rd, Holland Ave and Garland Ave	2013	Record Drawing (2240-4)

# 803 - Twin Cedars Sewer

## Infrastructure Condition Assessment and Capital Plan 1413 Hutchinson Rd, Cobble Hill, BC

Date Prepared

July 18, 2018

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 2, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
July 3, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

## 803 - Twin Cedars Sewer

Infrastructure Condition Assessment and Capital Plan 1413 Hutchinson Rd, Cobble Hill, BC

Date Prepared July 18, 2018

# **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

# Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical (0 - 1 Year)	1						
	2						\$0
(0 - 1 (ear)	3						
	4						
Important (1 - 2 Year)	5						\$0
	6						
Short Term	7

## 804 - Lambourn Estates Sewer

### Infrastructure Condition Assessment and Capital Plan 1226 Sutherland Dr, Cowichan Bay, BC

Date Prepared

July 18, 2018

#### **REPORT NOTES**

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood	The visual reviews were completed on November 21-24,
	and Kieran Bertsch	2017 by Adam Greenwood and Kieran Bertsch of MH.
		During our review of the systems we were accompanied by
		Mr. Todd Etherington and Mr. David Parker, who provided
		access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the
		geodatabase to MH. Caleb Light from MH tabulated the
		length of infrastructure in the developed area of the system
		from the database. The GIS items are the difference
		between the record drawings and the length of
		infrastructure tabulated in the geodatabase.
March 6, 2018	Adam Greenwood	Draft inventory assessment was issued to CVRD for review.
,	and Kieran Bertsch	,
July 3, 2018	Adam Greenwood	Updated draft inventory assessment was issued to CVRD for
	and Kieran Bertsch	review.
July 18, 2018	Adam Greenwood	Updated inventory assessment was issued to CVRD during
	and Kieran Bertsch	the March 27, 2018 review meeting. Updates included the
		following tasks:
		1) Reorganize linear assets based on street names
		2) Complete building asset management seperately (to be
		completed by Chris Raudoy)
		3) Include disclaimer on cost estimates
		4) Create seperate tables for O&M tasks and Capital Plans
		and update actions to Operations, Maintenance, Capital
		Renewal and Capital Upgrade/New

Infrastructure Condition Assessment and Capital Plan 1226 Sutherland Dr, Cowichan Bay, BC

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

## Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical	1						
Critical (0 - 1 Year)	2						\$0
	3						
langesternt	4						
Important (1 - 2 Year)	5						\$0
(1-2168)	6						
Short Term	7	1	S-STP-FTR-6	Capital Renewal	Replace membrane filters in STP.	\$120,000	
(2 - 5 Year)	8						\$120,000
(2 5 (car)	9						
	10						
Medium Term (5 - 10 Year)	11						\$0
(5 - 10 Year)	12						
						Total	\$120,000

## Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
	1						
Critical (0 - 1 Year)	2						\$0
(0 - 1 (ear)	3						
Important	4						
Important (1 - 2 Year)	5						\$0
(1 - 2 Tear)	6						
	7	2	ALL	Operations	Inspect/assess Polo Field Pl. lift station for deterioration to determine replacement timing/phasing.	\$10,000	
Short Term	8						
(2 - 5 Year)	9						\$10,000
(2 5 (cu))	10						
	11						
	12						
	13	1	ALL	Operations	Assess/Inspect wastewater treatment plant for deterioration to determine replacement timing/phasing.	\$20,000	
Medium Term	14	6, 8, 10, 11 and 13	As Noted	Operations	Assess/Inspect forcemains and air release valves for deterioration to determine replacement timing/phasing.	\$35,000	É05-000
(5 - 10 Year)	15	15 to 26	As Noted	Operations	Assess/Inspect collection system for sources of I&I and determine replacement timing/phasing.	\$40,000	\$95,000
	16						
	17						
						Total	\$105,000

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

Infrastructure Condition Assessment and Capital Plan 1112 Fitzgerald Rd, Shawnigan Lake, BC

#### PROPERTY STATISTICS AND REPORT SUMMARY

System Replacement Cost Estimate	\$4,794,942	
Number of Users	121	
Replacement Cost Per User	\$39,628	
Annual Replacement Cost (40 Years)	\$56,293	per year
Annual Replacement Cost (80 Years)	\$59,197	per year
10 Year Capital Plan Total	\$100,000	
10 Year Operations and Maintenance Plan Total	\$85,000	

#### **PROPERTY DESCRIPTION**

The Arbutus Mountain Estates Sewer System started construction in 2006 and includes the phases outlined in the table below.

Development	Year Installed	Source
Collection System	2006	Innova Report
Sewage Treatment Plant	2007	Record Drawing (05-131)
Lift Stations and Forcemains	2007	Record Drawing (1483)
Fitzgerald Road Collection System	2010	Record Drawing (197)

#### **PROJECT TEAM**

Austin Tokarek, Asset Coordinator Todd Etherington, Utility Operations Superintendent David Parker, Engineering Technologist III Rob Grant, GIS Supervisor Andrea Kross, GIS Technician I Adam Greenwood, Project Engineer Kieran Bertsch, E.I.T. Caleb Light, GIS

## 805 - Arbutus Mountain Estates Sewer

Infrastructure Condition Assessment and Capital Plan 1112 Fitzgerald Rd, Shawnigan Lake, BC

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 7, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
July 3, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

## 805 - Arbutus Mountain Estates Sewer

Infrastructure Condition Assessment and Capital Plan 1112 Fitzgerald Rd, Shawnigan Lake, BC

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

### 809 - Cobble Hill Sewer

Infrastructure Condition Assessment and Capital Plan 1532 Gallier Rd, Cobble Hill, BC

### **PROPERTY STATISTICS AND REPORT SUMMARY**

System Replacement Cost Estimate	\$1,492,455	
Number of Users	84	
Replacement Cost Per User	\$17,767.32	
Annual Replacement Cost (40 Years)	\$14,732	per year
Annual Replacement Cost (80 Years)	\$18,425	per year
10 Year Capital Plan Total	\$400,000	
10 Year Operations and Maintenance Plan Total	\$15,000	

### **PROPERTY DESCRIPTION**

The Cobble Hill Sewer system was constructed in 1993 and includes the phases outlined in the table below.

Development	Year Installed	Source
Original System	1993	Innova Report
STP Improvements	2009	Record Drawing (11310)

### **PROJECT TEAM**

Austin Tokarek, Asset Coordinator Todd Etherington, Utility Operations Superintendent David Parker, Engineering Technologist III Rob Grant, GIS Supervisor Andrea Kross, GIS Technician I Adam Greenwood, Project Engineer Kieran Bertsch, E.I.T. Caleb Light, GIS

# 809 - Cobble Hill Sewer

Infrastructure Condition Assessment and Capital Plan 1532 Gallier Rd, Cobble Hill, BC

Date Prepared

July 18, 2018

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided
March 2, 2018	Caleb Light	access to each system. Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 2, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
July 3, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

656

Date Prepared July 18, 2018

# **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

### Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
	1						
Critical	2						\$0
(0 - 1 Year)	3						
Important	4	1 and 2	ALL	Capital Upgrade/New	Secure funding to connect STP to Twin Cedar System. Decommission existing STP once connected to Twin Cedar System.	\$400,000	\$400,000
(1 - 2 Year)	5						1 ,
	6						
Short Term	7						
(2 - 5 Year)	8						\$0
(2 - 5 fear)	9						
	10						
Medium Term	11						\$0
(5 - 10 Year)	12						
						Total	\$400,000

## Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
- · · · ·	1						
Critical	2						\$0
(0 - 1 Year)	3						
	4						
Important	5						\$0
(1 - 2 Year)	6						
	7						
	8						
Short Term	9						\$0
(2 - 5 Year)	10						ŞΟ
	11						
	12						
	13	3 to 9	ALL	Operations	Assess/Inspect sewermains, manholes, and cleanouts for deterioration to determine replacement timing/phasing.	\$15,000	
Medium Term	14						
(5 - 10 Year)	15						\$15,000
	16						
	17						

			Total	\$15,000

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

## 810 - Mesachie Lake Sewer

Infrastructure Condition Assessment and Capital Plan 6740 Forestry Road, Mesachie Lake, BC

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood and Kieran Bertsch	The visual reviews were completed on November 21-24, 2017 by Adam Greenwood and Kieran Bertsch of MH. During our review of the systems we were accompanied by Mr. Todd Etherington and Mr. David Parker, who provided access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the geodatabase to MH. Caleb Light from MH tabulated the length of infrastructure in the developed area of the system from the database. The GIS items are the difference between the record drawings and the length of infrastructure tabulated in the geodatabase.
March 7, 2018	Adam Greenwood and Kieran Bertsch	Draft inventory assessment was issued to CVRD for review.
June 12, 2018	Adam Greenwood and Kieran Bertsch	Updated draft inventory assessment was issued to CVRD for review.
July 18, 2018	Adam Greenwood and Kieran Bertsch	Updated inventory assessment was issued to CVRD during the March 27, 2018 review meeting. Updates included the following tasks: 1) Reorganize linear assets based on street names 2) Complete building asset management seperately (to be completed by Chris Raudoy) 3) Include disclaimer on cost estimates 4) Create seperate tables for O&M tasks and Capital Plans and update actions to Operations, Maintenance, Capital Renewal and Capital Upgrade/New

6740 Forestry Road, Mesachie Lake, BC

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan - DRAFT**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

## Table 1: 10 Year Capital Plan - DRAFT

		During our review of the systems we were accompanied by
		Mr. Todd Etherington and Mr. David Parker, who provided
		access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the
		geodatabase to MH. Caleb Light from MH tabulated the
		length of infrastructure in the developed area of the system
		from the database. The GIS items are the difference
		between the record drawings and the length of
		infrastructure tabulated in the geodatabase.
March 8, 2018	Adam Greenwood	Draft inventory assessment was issued to CVRD for review.
	and Kieran Bertsch	
July 4, 2018	Adam Greenwood	Updated draft inventory assessment was issued to CVRD for
	and Kieran Bertsch	review.
July 18, 2018	Adam Greenwood	Updated inventory assessment was issued to CVRD during
	and Kieran Bertsch	the March 27, 2018 review meeting. Updates included the
		following tasks:
		1) Reorganize linear assets based on street names
		2) Complete building asset management seperately (to be
		completed by Chris Raudoy)
		3) Include disclaimer on cost estimates
		4) Create seperate tables for O&M tasks and Capital Plans
		and update actions to Operations, Maintenance, Capital
		Renewal and Capital Upgrade/New

### 811 - Bald Mountain Sewer

Infrastructure Condition Assessment and Capital Plan 9455 Marble Bay Rd, Honeymoon Bay, BC

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

## Table 1: 10 Year Capital Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
Critical	1						
Critical (0 - 1 Year)	2						\$0
	3						
luc a cato a t	4						
Important (1 - 2 Year)	5						\$0
	6						
Short Term	7						
(2 - 5 Year)	8						\$0
(2 - 5 Tear)	9						
	10						
Medium Term (5 - 10 Year)	11						\$0
(5 - 10 fear)	12						
						Total	\$0

Table 2: 10 Year Operations and Maintenance Plan - DRAFT

Timing	Item	Asset ID	Asset Code	Type of Work	Recommendation Description	Value	Total
	1						
Critical	2						\$0
(0 - 1 Year)	3						
luc a cuto at	4						
Important (1 - 2 Year)	5						\$0
(I - Z Year)	6						
	7	1	S-STP-FTR-6	Operations	Assess/inspect filter membranes for deterioration to determine replacement timing/phasing. Replace membrane filters when they reach the end of their design life.	\$5,000	
(2 - 5 Year)	8	2	ALL	Operations	Inspect/assess lift stations for deterioration to determine replacement timing/phasing.	\$10,000	\$15,000
	9						
	10						
	11						
	12				Assess/inspect wastewater treatment plant for deterioration to		
	13	1	ALL	Operations	determine replacement timing/phasing.	\$15,000	
Medium Term	14	3, 4, 5 and 13	ALL	Operations	Assess/Inspect forcemains for deterioration to determine replacement timing/phasing.	\$20,000	\$35,000
(5 - 10 Year)	15						
	16						
	17						
						Total	\$50,000

**Disclaimer**: Cost estimates listed above are based on limited information and should only be considered as order of magnitude costs. Further assessment and design is required to improve the accuracy of these estimates.

## 813 - Mill Springs Sewer

Infrastructure Condition Assessment and Capital Plan 927 Deloume Rd, Mill Bay, BC

#### **PROPERTY STATISTICS AND REPORT SUMMARY**

System Replacement Cost Estimate	\$8,227,184	
Number of Users	210	
Replacement Cost Per User	\$39,177	
Annual Replacement Cost (40 Years)	\$77,668	per year
Annual Replacement Cost (80 Years)	\$101,570	per year
10 Year Capital Plan Total	\$0	
10 Year Operations and Maintenance Plan Total	\$85,000	

#### **PROPERTY DESCRIPTION**

The Mill Springs Sewer System was construction in 1997 and includes the phases outlined in the table below.

Development	Year Installed	Source
Phase 1A - Frayne Rd, Deloume Rd	1997	Record Drawing (C438 001 02 02)
Phase 2 - Gatewheel Rd	2004	Record Drawing (F235-001-00)
Phase 5 - Boompond Rd	2006	Record Drawing (F235-005-00)
Phase 6 - Bucktail Rd, Glendoik Rd	2006	Record Drawing (F235-006-00)
Phase 8 - Bucktail Rd, Deloume Rd	2008	Record Drawing (F235-008-00)
Phase 9 - Gillespie Place	2008	Record Drawing (F235-010-01)
Phase 10 - Mcclaren Rd, Tutor Way, Pratt Rd	2010	Record Drawing (F235-010-02)
Phase 11 - Tutor Way	2011	Record Drawing (60147531)
Phase 13/14 - Pratt Rd, Faulkner Pl, Marie Rd	2015	Record Drawing (60301901)
Phase 15 - Blairgowrie Rd	2016	Record Drawing (60484147)
Sewage Treatment Plant Upgrade	2015	Record Drawing (13198)

## 813 - Mill Springs Sewer

Infrastructure Condition Assessment and Capital Plan 927 Deloume Rd, Mill Bay, BC

Date Prepared

July 18, 2018

#### **REPORT NOTES**

Date / Revision	Contact	Comment
November 21, 2017	Adam Greenwood	The visual reviews were completed on November 21-24,
	and Kieran Bertsch	2017 by Adam Greenwood and Kieran Bertsch of MH.
		During our review of the systems we were accompanied by
		Mr. Todd Etherington and Mr. David Parker, who provided
		access to each system.
March 2, 2018	Caleb Light	Rob Grant and Andrea Kross from CVRD provided the
		geodatabase to MH. Caleb Light from MH tabulated the
		length of infrastructure in the developed area of the system
		from the database. The GIS items are the difference
		between the record drawings and the length of
		infrastructure tabulated in the geodatabase.
March 8, 2018	Adam Greenwood	Draft inventory assessment was issued to CVRD for review.
	and Kieran Bertsch	Dialt inventory assessment was issued to CVRD for review.
July 4, 2018	Adam Greenwood	Updated draft inventory assessment was issued to CVRD for
July 4, 2010	and Kieran Bertsch	review.
July 18, 2018	Adam Greenwood	Updated inventory assessment was issued to CVRD during
, _0, _0_0	and Kieran Bertsch	the March 27, 2018 review meeting. Updates included the
		following tasks:
		1) Reorganize linear assets based on street names
		2) Complete building asset management seperately (to be
		completed by Chris Raudoy)
		3) Include disclaimer on cost estimates
		4) Create seperate tables for O&M tasks and Capital Plans
		and update actions to Operations, Maintenance, Capital
		Renewal and Capital Upgrade/New

Date Prepared July 18, 2018

## **10 Year Capital Plan and Operations and Maintenance Plan**

The Capital Plan and Operations and Maintenance Plan outlined below are based on the findings of the initial condition assessment. The tasks identified in these plans should be completed within the next 10 years to inform the necessary infrastructure maintainance, rehabilitation and replacement work to maintain the appropriate level of service for the users of the system. The findings of the initial condition assessment should be reviewed by the CVRD to ensure they reflect the current condition of the system.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Deloume rd: Phase 1A (from Sewage treatment sit FM PP 86                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 5 55 1011 67 

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
